To start the conversation again, just ask a new question: Q: I have an iPad mini and can't download the Netflix app. It asks for iOS 10 or later and my current version is the latest version. How do I download iPad Mini Wi-Fi + Cellular, iOS 9.3.5 Posted on April 21, 2018 6:46 AM Answer I have this question as well (7236) I have this question as well (7236) I answered too: Answer: Posted on 21 April 2018 6:51 AM May 19, 2018 14:17 In response to the Smart212 in response to smart212, what I did was download Netflix on my iPhone 7 and then log in to icloud on my iPad that runs 9.3.5 with the same ID I used on my iPhone 7, then on your IPAD mini, go to the App Store in the Purchases tab, you'll see Netflix, you'll see Netflix, click the download button, then ask you to install the old version of Netflix. Strangely, credit: the answer doesn't work for me: If you just went into the site version, then you would ask netflix if you want to download the app, then it says want to download the old version, then it will work May 19, 2018 14:17 pm. May 15, 2018 11:12 a.m. To respond to Smart212 in response to Smart212, if you've just gone to the website version, Netflix will ask you if you want to download the app, then will tell you if you want to download the old version, then it will work May 15, 2018 11:12 AM May 19 2018 3:3 PM to respond to two smart212 ways to respond to smart212. The first and easiest way is to download the newest app to the newer iDevice first, then go back to your older version of iDevice, download the newest version of the app again, and if the developer has/has discarded an older and compatible version of the app on apple's app server, you will get a small window pop-up indicating that there is an older version of the app compatible with your device. Do you want to download this version now? Tap the OK button below the prompt to start downloading older versions of the app to your iPad if you want an app for your older version of iDevice. If you have a computer with an older version of iTunes (version 12.6.4 or earlier), you can try downloading the latest app/s by accessing the iOS App Store through iTunes, then downloading the latest version of the app/s you want to use on the older iDevice to iTunes on your computer first. If you already own a computer with older versions of iTunes, try that version of the older iDevice, not necessarily the latest iTunes. You have a computer but no iTunes here, here is a link to an older version 12.6.3 for downloads found in this Apple web link. If you downloaded the latest version of iTunes 12.7.x, then there is no something I have written here in reply to this post, this may work! You'll need to use an older version of iTunes and when you download and install it on your computer when enabled, press and hold the Opt/Alt key on your keyboard while launching this old version of iTunee so that you can create a new iTunes library before you do it immediately above if you're using iTunes on your computer and already have an iTunes library, you'll need to find the iTunes library folder on your computer and temporarily move/copy the folder. Then back to your older iDevice, you can try downloading the latest app from the iOS App Store, and if the developer has/has/left an older compatible app/app on apple's app server, you'll get a small window pop-up indicating that there's an older version of the app compatible with your device. Do you want to download this version now? Tap the OK button below the prompt to start downloading older versions of the app to your iDevice. That may be the case, and the Netflix site has changed a little from the last time I tried to download an older version of Netflix from a site location, so maybe that step no longer works, that's definitely possible.
